Re: Policies and Rules Implementing the Telephone Disclosure  
and Dispute Resolution Act

Dear Commissioner's:

900 America is a service bureau and a re-seller of long  
distance service since 1989.

I'm very concerned about proposed rule making changes that  
could put this company out of business.

Only three carriers offer 900 numbers: AT&T, MCI, and Sprint  
for transport purposes. IXC's are shut out and must be able  
to explore other areas of billing for audiotext services.

Abuse is running rapid not only now by the consumer but also  
by AT&T and MCI toward the information provider where premium  
billing services are concerned. I'm all for protecting the  
public interest, however there is severe abuse by the carriers  
who change their policy overnight and IP's are put out in  
the cold and bankrupt. Termination of a program that are not  
in violation of any regulation or law can be and have been  
terminated with little or no notice. The carrier then keeps  
all the monies for a period of time and returns little and in  
one case returned none. We are talking about million's of  
dollars. This area needs some type of regulation.

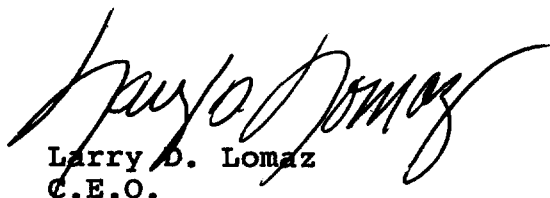

As other types of technology develop in audiotext we find  
collect calls very popular by legitimate businesses who will  
not entertain 900 services. Your concerns about abuse are  
well taken, we must explore guidelines of regulations but  
not eliminate. We must also consider the creditability of  
complaints. Are these people the one's that just look for

I'm aware the committee does not endorse consumer fraud, however it's happening at a record pace.

I would respectfully ask the commission to consider my two main concerns:

1. Do not totality eliminate audiotext calls on a collect bases.
2. Demand carriers that provide 900 service to give at least 30 day notice of termination of any program that is not in violation of any law. Monies owed to a service bureau or IP be paid in full no later than 90 days after notice of termination.

Sincerely,

Larry D. Lomaz  
C.E.O.
